Can not read the few maps that this book has. If you are going to put a book on Kindle, look at it first.

By chewey Excellent guide book; I wished there were more information on the techniques in taking these really nice pictures.

Highest, lowest, largest, oldest: Southern California is a land of superlatives, from the alpine summit of Mount Whitney (14,495 feet above sea level) in the Sierra Nevada range, to the salty pool at Badwater (282 feet below sea level) in the depths of Death Valley; from groves of giant sequoia trees standing more than 250 feet tall, to desert plants more than four thousand years old. To help you explore these sites and dozens more, "Backroads of Southern California" written and photographed by a local expert and tour guide features spectacularly varied and vibrantly seductive backroads and showcases the compelling scenery and colorful history in the lower half of the Golden State. Whether you're planning a day trip, looking for unusual destinations, or simply want to learn more about the region, "Backroads of Southern California" will lead you deep into the soul of the southern part of the state beyond the bustling cities and common tourist attractions. About the Author/Photographer: Dave Wyman is a professional photographer and freelance writer based in Los Angeles. The author/photographer of Voyageur Press's "Backroads of Northern California," he has published articles and photographs in such publications as "Backpacker," "Outdoor Photographer," "Outside," and "Sierra." Wyman also owns and operates Image Quest, a natural history and photography tour company.
